BBC LS36

Built under license from the BBC the Stirling Broadcast LS3/6 Reference Loudspeaker is a 3-way loudspeaker designed by Derek Hughes to be as close to the original BBC LS3/6 specification as possible with modern components.

We have taken advantage of the greater consistency and linearity of modern drive units and use a very high quality crossover to mesh the custom made drive units, including a super-tweeter, into thin wall (9mm), damped construction, birch plywood cabinets finished in pair matched wood veneer with a matt lacquer finish. The cabinets utilise double thickness rubber damping pads to tame cabinet wall resonances and foam for internal standing wave dampening. The cabinets feature screw-on, removable front and rear panels as per the BBC "lossy" cabinet design ideal. Our version of the LS3/6 offers greater power-handling than the original, with a smoother frequency response, much lower coloration and better dispersion.

The LS3/6 was listed as a Stereophile Class B speaker for 2014 and they summed them up with "the LS3/6 produced a natural, compelling sound, with a good sense of space and an especially warm, rich, textured midrange - Heartily recommended". Robert E Green of The Absolute Sound said "To say that I like and admire the LS3/6 is to understate the case. This speaker seems to me a true realization of a dream that many audiophiles have held for a long time: a modern (and available) speaker with the unique virtues of the Spendor BC-1/ BBC LS3/6".

The LS3/6 comes with our standard 5 year warranty on the drive units and crossovers.
